

BioTech CAD/CAM Video

This video of the CAD/CAM system demonstrates how the clinician can maintain full control while the computer automates the most error prone parts of the process.

In conjunction with the [FastSCAN Scorpion](#) and BioSculptor modification software, Yanke Bionics also has invested in the most advanced CAM equipment: the Biosculptor carver, which allows for a new wave of speed and accuracy in fabricating prosthetic sockets. Together, these systems represent an enormous dedication in the future of Yanke Bionics patients. All of this combined helps our patients to achieve our mission statement of "Accept No Limitations".
